- Having 4.6+ years of experience in developing Web and Enterprise Applications using technologies like **.Net**, **Azure**, Oracle **PL SQL**, Angular, .Net core.
- Microsoft certified Azure developer (AZ-204)
- Worked in agile methodologies and certified in scaled agile framework SAFe 4.0
- Certified Full stack developer – IIHT.
- Analysis user requirements, preparing Functional and Technical design documents and developing modules.
- An enthusiast in working Niche technologies & take up challenging tasks.
- Seeking a challenging position where I can further develop my skills and continue to advance in my career.

SKILL SET:

- **Frameworks**   : .Net Framework 4.5, .Net core
- **Languages / Technologies**   : C#, MVC , HTML 5, WCF , Web API, MVC, Open API (Swagger), HTML 5
- **Data-Base**   : Oracle PL SQL**,** MySQL
- **IDE/TOOLS**   : Visual studio, VS Code, SOAP-UI, Post Man
- **Cloud**   : **Azure Developer**
- **SDLC**   : Agile , SAFe 4.0
- **Version Control** : TFS
- **Domain**   : Banking

CERTIFICATIONS

- Microsoft Certified Azure Developer (**AZ-204**).

- SAFe Agilist 4.0

- Certified Full Stack developer – IIHT

PROJECT-1: Investment Risk and Analytical Services

Domain   : Banking and Financial Services

Client is a financial services company catering institutional investors, corporations and high net worth individuals for their investment portfolios. IRAS web services assist investment and portfolio managers by generating performance metrics related to asset returns, contributions, market values and weights based on stock market data. Metrics are compounded based on hierarchy, Geography, Category and portfolios. The generated metrics help consumers in making investment decisions analyze the assets values and trends

Technology Stack: WCF, C#, .NET Framework, Oracle, PLSQL, SOAP UI, J meter, NUnit, Bamboo , Postman, Putty

Roles and Responsibilities :

- My role involves Analysis, Design, Development, Unit Testing.
- Project adheres to Agile methodologies and follow agile standards for deliverables.
- Develop designs, Use cases and data flows for new dockets.
- Manage small sized team, scum calls, Technical and service audits.
- Hot fixes during production release, resolve regression issues.
- Defect fixing during unit testing, integration testing and regression testing

PROJECT- 2: IRAS Fundamentals and Dashboards

Client is a financial services company catering institutional investors, corporations and high net worth individuals. XML's/JSON's responses from services are exported into Dashboard. This project was initially developed in flux but later it is migrated into Angular. My role was to write components, services, resolve issues and small designs.

Technology Stack : Angular , Oracle, HTML, CSS, Java Script.

Roles and Responsibilities :

- Worked with Team to develop new components, designs.
- Develop designs, flows, porotypes for large requirements
- Regression, Defect fixing and pre and post production fixes.

PROJECT- 3: PCF and Boston Partners Bulk Data Application

Project Description :

Client is a financial services company catering institutional investors, corporations and high net worth individuals. PCF bulk data tool is a UI application build in Angular to request API for bulk data needed and queue job in Control M. It helps in generating a request and post it in the queue to generate text file in Unix host.

Technology Stack : React, MVC, HTML, CSS, JavaScript.

Roles and Responsibilities :

- Worked with Team in developing components, designs.
- Defect fixing during unit testing, integration testing and regression testing.

- Chair daily huddle and scrums , sprint planning

- Post production Support post release

- Test Driven and Behaviour driven developments

- Maintain Scrum and follow agile methodologies

PROJECT- 4: Audit-Client Micro services

Project Description :

An internal application that later emerged into a full product where two independent APIs Audit, Client that communicate with each other using Micro service architecture. Two microservices solving their independent purposes and being used at the endpoints to send and receive the data , necessary approvals on the records added, data shared through the application.

Technology Stack : Azure – service bus, queue, Azure functions, Azure DB , .Net core, Open API, Web API, EF Core , Logic app.

Roles and Responsibilities :

- Worked as a single developer from offshore being coordinated by onsite solution architect.

- Used Azure cosmos DB, service bus, Queues, Az functions, Open API, .Net core.

- Multiple discussions with clients on design, approach and functional testing.

- Defect tracking and issue fix during the SIT/UAT phases and hot fixes at prod release

- Developed a few automation logic apps to remove the unused files to archive folder.

ACADEMIC QUALIFICATIONS:

- **Bachelor of Technology (Biotechnology)**
  Lovely Professional University, Punjab.
  CGPA: **8.7**   Year : 2016

- **12 th Standard**
  Narayana Institutions, Hyderabad
  Percentage of marks: **91.1%** Year **:** 2012

- **10 th / SSC**
  GVP High School, Hyderabad .
  Percentage of marks: **95%**   Year : 2010

KEY-ACHIEVEMENTS

- Received Best developer award 2018 in Cognizant Digital business vertical.
- Multiple client appreciations on key deliverables
